To the back on the second seco	
In the harbor, Bulgarian ships and motorboats were busy unloading timber.	
A tall radio antenna is located west of Burgas, and a red light is mounted on the top. South of this antenna are three factory buildings with a single chimney. Another factory-like building is located south of these buildings.	
Appendix "B" shows the Port of Burgas and gives the location of the radio antenna, factory, and other installations?.	25
On 30 April, the streets, shops, and schools in the city of Burgas were decorated with Bulgarian and Soviet flags and pictures of Communist personalities, in preparation for the festival on 1 May.	20
The proportion for the resultant on I have	
camouflaged guns on Cape "Poffos"	
(probably Cape Foros), at approximately Nu2-28, E27-31.	25
On the southern shore of the Gulf of Burgas, at approximately Nu2-27, E27-36, a round instrument (probably radar), mounted on a conical base. Nearby was a rectangular instrument on a short post mounted on a tri-angular base. Beside this instrument was a small building.	
"fake" fortifications at approximately Nh2-28, E27-hl.	
Comments:	
Comments:  1. The "instrument for searching" may have been a paravane for sweeping mines.  2. The sketch of the Port of Burgas is most interesting in that it shows a basin with a pier just west of the inner harbor and outside of the breakwater and western mole. An interesting new development, if true.
